AON Advise on Alarm systems:
 For alarms relating to storage there is no required clearance.
 However, you need to keep in mind the when storing to the roof, storage may effectively create a wall.
 NZS 4512:2010 states that anything over 460mm is considered a wall. (storage pallets with product stored to roof could be considered as a wall)
 Any clearance is recommended to stop the above from happening.
 To be checked and confirmed by alarm contractor issuing PS3.
